*Red 15mm Clear neon / GE Tetra Red LED's;
information is estimate, actual results may vary.
**LED information provided by www.lumination.com
***60ma neon transformers compared
with GE GECLPS3 LED power supplies
****Based on 12hours of operation per day @ \$0.10/KWH

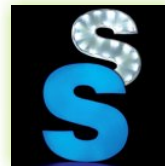

Benefits

The **benefits of using LEDs** vary depending on the application, but typical features include:

- Up to 90 percent **energy-cost savings**
- A long life of up to 50,000 - 100,000 hours
- **Minimized maintenance** hassles and costs
- **Low-voltage** operation
- **Excellent cold-weather** performance

Environmental friendliness is also a factor, as LEDs do not contain mercury.
